## Description:

Thank you for purchasing *AGS Animated Galaxy Skybox* – is a Unity skybox ready to use with all space-themed applications.

What makes it different from a casual skybox? It is fully animated, live and customizable - colors, shapes, complexities - you name it. It's not a single, static image - it is a fully dynamic sky tailored just like you need it.

Installation guide:

- Download asset into your project

- Select Unity **Lighting** tab (in Window/Lighting menu)

- Select *AGSSkybox* material as skybox

- Enjoy your new animated skybox in play mode ☺

- If you want to adjust material settings, select it and change values in the inspector:
